

I would like to take this opportunity to extend my contribution of honoring Prosurge , as a very reliable source of Surge Protection Devices.I have been dealing with Hi-Tech/ Prosurge for over 20years and I have come to know Mr Terry Mao, As very Honest person along with all the staff at Prosurge.

A.K. Power Solutions has been a very Firm customer of Prosurge over 15 years using the Low Voltage Arrestor which was originally designed by AKP and manufactured by Hi-tech / Prosurge.

This product AKP has never had a failure on sight therefore I can say that Prosurge is a high standard Company with high technical engineers and factory staff. All types of performance enhancing standards are met example UL1449 and IEC61643 series.

They have SPD products with International safety approvals including UL1449 and IEC61643 and CE.to suit all end users.

Working with Prosurge is so easily done because all questions regarding their product range are so easily explained and quickly delivered.

I am working currently on SPD products with a few Customers in Australia and we will be looking to the future at securing more business.

I would recommend Prosurge as a very High Standard Company with all the R & D facilities to develop various applications and solutions to your needs.

I fully recommend Prosurge.

Thanking You
